

Crystal White

Visual Experience

- *Smooth images*
- *Wide viewing cone*
- *Brighter vibrant images*
- *Optically natural*

Crystal White screens are ideal for customers who have a dedicated home theatre room, and preference for more natural reflected images .

Projectors with the new dark chip and colour wheel segment, images reflected from the screen will give you the same experience as the Cinema.

Environment is always a key factor for any set up. For example, having the right decorative wall is not merely for aesthetic reasons, the wall also serves to absorb reflected light and for sound proofing purposes.

CYRUS

Cine Projection Screen

Abstract Grey

Visual Experience

- *Ambient Light rejection.*
- *Higher Vibrancy & Sharper Images.*
- *Increase Black Level*
- *Brings out Depth & Detail*

Tired of flat non-vibrant images? Now you can have a high resolution screen surface which brings out the best picture from any projector.

The Abstract Grey screen is able to increase the black level, colour contrast and yet bright enough to bring out the white field. A high quality image is achieved with ambient light rejection.

Abstract grey is developed for high resolution projection. Its smooth, consistent surface ensures a pleasurable viewing experience at all times.

Don't compromise on what your home theatre is able to achieve. Change to Abstract Grey to view better .

The choices of the screen material will allow you to make changes on the location of your “Home theatre”. White Diamond can be positioned in places where you require more ambient lights and visually experience the large screen without losing the contrast and brightness.

Coated with optical spectrum particles, bonded onto a black backing, reflected images will be maximized for your viewing pleasure. Consult the home theatre specialist on your special requirements.

Specifications

- Semi rigid material
- White base / black backing
- Optical spectrum
- Heat treated coat surface
- Gain 1.35
- Viewing angle 140
- 100% Able to clean surface

Black Mambo

Visual Experience

- ***Enhances Black level.***
- ***Colour contrast increase.***
- ***Brighter vibrant images.***
- ***More depth .***

At last a front screen which able to provide the depth, details and brightness of the movies. No more second guessing what you missed in the dark scenes of the movies.

Black Mambo will give you the visual experience comparative to the rear TV Plasma or LCD but on a large screen format with more punch!

Couple Black Mambo with a 1080P DLP, DILA or LCD projector and you will find your movie coming alive, with excellent black levels, detailing and saturated colour images.

Specifications
